Senior Software Engineer

Summary

Software engineer with experience using AI to develop and maintain web applications, RESTful API's, test automation frameworks, and reporting tools.

Work Experience

Sikora Collective Alameda, California

Founder / Software Engineer January 2024 - Present

- Reduced third-party development costs by using AI tools to bring website development and maintenance work in-house
- Increased website traffic by 20% over six months by using AI to analyze performance data and optimize existing content
- Automated routine website updates and quality checks to reduce manual work and improve efficiency
- *Websites:* LiveTheDTOUR.com, WhereDoITakeMyParents.com
- *GitHub:* https://github.com/sikoracollective
- *Technologies:* Cursor AI, Codex, Python, MySQL, Playwright, Docker, ChatGPT, WordPress, Bash, PHP, GitHub, Google Analytics, Lightroom, Markdown

Anaplan San Francisco, California

Software Engineer / Senior SDET June 2017 - August 2023

- Managed and maintained a RESTful auditing service for the product
- Built Splunk reporting dashboards that helped reduce exceptions and errors by 30% over a six-month period
- Created and maintained continuous integration (CI) pipelines using Jenkins
- Wrote unit, functional, and integration tests for multiple RESTful services
- *Technologies:* Java, Kotlin, Spring Boot, Kubernetes, Docker, RabbitMQ, MySQL, Selenium WebDriver, Cucumber, Jenkins, JUnit, Postman, GitHub, Splunk, Regular expressions, Markdown

MarkMonitor San Francisco, California

Senior Software Development Engineer in Test (SDET) February 2016 - May 2017

- Developed automated functional and integration tests for core application features
- Improved the test automation framework to make coverage easier for the team to track
- Created ELK dashboards that helped teams spot and investigate production issues faster
- *Technologies:* Java, TestNG, JUnit, REST Assured, MySQL, Jenkins, Postman, GitHub, SonarQube, ELK

Intuit / Demandforce San Francisco, California
Senior SDET March 2012 - February 2016

- Managed a successful customer account migration following a company acquisition, earning a department-wide award for outstanding performance
- Developed reporting dashboards for all engineering teams that helped reduce production errors by 40% over a three-month period
- *Technologies:* Java, TestNG, Selenium WebDriver, MySQL, Jenkins, Postman, GitHub, Splunk, SonarQube, Regular expressions

MobiTV Emeryville, California
Senior SDET September 2010 - March 2012

- Developed a Lua-based test automation framework for end-to-end mobile application testing
- Managed daily quality checks, investigated failures, and documented issues for follow-up
- *Technologies:* Java, JSP, Lua, MySQL, HTML

Education

University of Wisconsin–Madison Madison, Wisconsin
Bachelor of Science in Computer Science
